

Arjun CB

Senior Software Developer — Game & XR Development, AI Integration

Ernakulam, Kerala, India | +91 9400877011 | arjun.c.b.1994@gmail.com | linkedin.com/in/arjun-cb-5a77b284

Summary

Senior developer specializing in game and XR development with applied AI/ML integration. Currently building gamified experiences at Snapwork Technologies using Svelte, Phaser, and Contentful. Previously built VR training simulations (CPR/COVID protocols, WebGL-based science labs) using Unity, C#, and Oculus VR SDK, and led development on an indie game team. Hands-on with applied machine learning and computer vision (YOLOv5, TensorFlow, PyTorch, OpenCV). Earlier career includes 4.5 years at SAP Labs India building ERP extensibility, AR commerce tools, and enterprise API integrations, providing a strong foundation in production-scale software delivery.

Skills

Game & XR Technologies: Unity 3D, Unreal Engine 5, Phaser, Oculus VR SDK, Three.js, XR Development

AI / ML & Computer Vision: TensorFlow, PyTorch, Keras, OpenCV, YOLOv5, KNN, Numpy

Programming Languages: C#, C++, C, Python, Java, JavaScript

Web & Application Development: Svelte, Flask, Django, HTML5, PHP, MySQL, PostgreSQL

SAP / Enterprise Technologies: ABAP, SAP UI5, SAP HANA DB, Adobe LiveCycle Designer, OData

Platforms & Tools: Windows, Linux, Android, Git, GitHub, Discord, Trello, Blender, Mixamo

Professional Experience

Senior Game Developer, Snapwork Technologies

Jun 2025 – Present

Ernakulam, Kerala, India

- Develop gamified applications for enterprise client GCash (Philippines) as part of a gamification development team, building interactive experiences for celebratory events, year-end reviews, and seasonal campaigns.
- Build and maintain applications using Svelte, Phaser, Contentful, and Lottie for real-time animation and content-managed game experiences.
- *(Optional: add a metric here – e.g. user engagement lift, number of campaigns shipped, or team/feature scope.)*

Team Lead, Indie Games Startup Landing Company

Jan 2024 – Apr 2025

Remote

- Led a globally distributed team through end-to-end development of indie games, from concept through delivery.
- Managed development workflow using Unreal Engine, Unity, GitHub, Discord, and Trello across a distributed contributor base.

Senior Software Developer, Amrita CREATE

Jan 2022 – Sep 2023

Kerala, India

- Built MEDSIM, a medical VR training simulation for CPR and COVID-19 initial screening protocols, covering scene design, animation, scripting, grab/interaction systems, and hand tracking using Unity,

C#, and Oculus VR SDK.

- Developed OLABS, a WebGL-based educational VR/simulation platform for classes 6–10 and undergraduate-level science labs, including scene and cinemachine camera design, interaction systems, and server hosting; tested across HTML5 and WAMP-based WebGL deployments.

Developer – Total Cost of Ownership, SAP Labs India
Bangalore, India

Jul 2016 – Jan 2021

- Built Smart Buy, an AR-based markerless commerce solution enabling any e-commerce platform to offer AR try-on, reducing product returns (Unity, Android Studio).
- Designed Tripti, a JIT resource-mapping solution for NGOs and relief camps during the Kerala–Karnataka floods; won first prize and initial funding at the Invnt 2018 inter-entrepreneurial contest (GMaps, SAP UI5).
- Developed APIs for ERP modules spanning Purchasing, Material Management, and Quality Management; built self-service configuration tools and Adobe-based PDF output forms for certificate and document generation.
- Modernized a legacy Gantt Chart project management tool from outdated Java technology to the modern UI5 framework; wrote unit tests and resolved production incidents.

Other Projects

Vehicle Identification System

Jul 2021 – Dec 2021

Computer vision system to identify vehicle type, make, and color from images using YOLOv5 object detection, KNN-based color histogram classification, and Elasticsearch; built the dataset, training pipeline, and inference stack in Python with Django and Flask.

Surveillance Suite

Jul 2021 – Dec 2021

Campus surveillance system for camera, user, and access management with face recognition and access control; built APIs and databases with Flask, Django, and MySQL, configuration UIs with JavaScript/HTML5/CSS, and server-side maintenance scripts for auto-deletion and video streaming in Python/shell.

Education

MTech, Software Engineering (Data Science Specialization)

Aug 2019 – Dec 2021

BITS Pilani, Work Integrated Learning Programme — GPA: 7.90/10

BTech, Computer Science and Engineering

Jun 2012 – May 2016

Amrita Vishwa Vidyapeetham, Amritapuri — GPA: 8.11/10

Awards

Innvent Winner – 1 Billion Lives Challenge, SAP Labs Innovation Challenge

2018

Won best idea award (out of 200 entries) under the "1 Billion Lives" pillar for Tripti, an NGO relief-resource mapping solution; received initial funding of Rs. 1 Lakh.

CSR Lead Award, AIS

2017

Recognized for leading CSR initiatives, including a month-long essentials delivery program supporting 500+ students.
